7. Shows number of received-on-account, charge and paid-out records made.
8. Can be quickly reset to zero, but not without the proprietor's knowledge:
9. Total adding capacity—\$99,999.99.

## Sales-strip Registers

One of the most useful and important features of a National Cash Register is the printed sales-strip. A record of each operation of the Register is printed on the strip.

### *How It May Be Used*

**S**HOULD it be desired to get divisions of records made during certain parts of the day, the sales-strip can be spaced forward. A blank space will show on the sales-strip when this is done. Spacing the sales-strip at noon enables the merchant to tell just what records were made in the forenoon and in the afternoon. Should a merchant be absent from his store for several days, he can instruct the head clerk to mail the sales-strip to him daily. This will enable him to see exactly what is occurring during his absence.

### *The Illustration Shows a Section of the Sales-strip*

Charge sale of \$2.50 by Clerk D.....	★ A 1 Ch D 2.50

11. Can be quickly reset to zero, but not without the proprietor's knowledge.
12. Total adding capacity, \$999,999.99.

# Printing Mechanism of the Class 400

## The Printed Check Feature

Front of Check

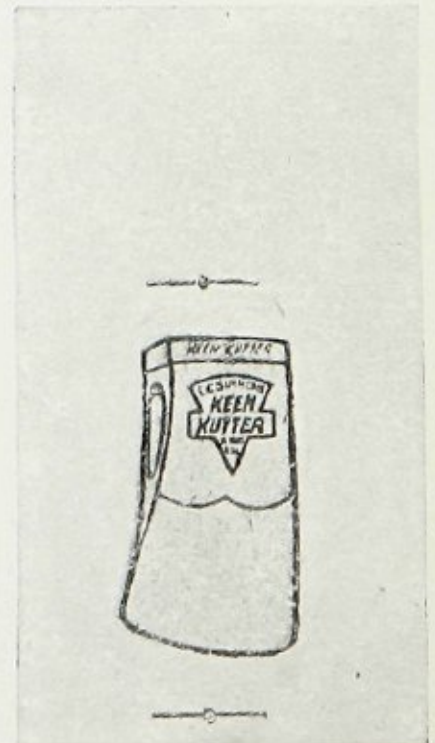

Absolute protection is provided only where the customer becomes a part of the purchase to the extent of receiving a receipt.

**T**HE mechanism, of Class 400 sales-strip and check-printer device requires little care. It is automatic in its operation, printing the record on the sales-strip and on the check, together with other printed matter desired. The checks are cut off and thrown into a receiver in the check printer hood.

A great many of the most successful business houses throughout the country have an imperative rule that a voucher or check must be delivered to the customer with every sale.

The checks printed by our Class 400 Registers enable the merchant to secure this advantage with the least possible delay; at the same time they provide means of advertising at a very nominal cost. The checks also provide the best method of giving a discount on cash sales. Many merchants employ this method for increasing their cash sales,

The reading matter on the back of checks printed by Class 400 Registers can be changed from time to time.

### **This Class 400 Register Prints a Check**

*The printed check issued by this style Register affords one of the best methods known to increase cash sales.*

### **What It Does**

This Register is the same in every way as No. 441, but in addition has the

### **Printed Check Feature**

This feature on the Class 400 Registers enables the merchant to deliver to the customer a printed record of the sale.

This printed check may also be used where customers pay the cashier. When used in this manner the Register is operated by the clerks to issue the checks. When used in this way the Register shows at all times how much money the cashier has received.

No. 452

Price  
\$350

**This Register is made to Record Amounts from 1c to \$99.99, or from 5c to \$99.95**

*This Register is the same in every way as the No. 442, but with a larger registering capacity, and contains a larger cash drawer.*

### **The Double Bank Class 400 Register**

*The double bank of keys gives higher registering capacity on the same size machine.*

*On the Register illustrated here amounts can be recorded from 5c to \$999.95.*

### **Class 400 Registers with Double Row of Keys**

**A**NY Class 400 Register can be constructed with double row of keys in the first bank when no amount key of less than five cents is wanted. Except 410, 411, 415, 416, 420, 421 and 440.

The double row of keys will record amounts from five (5) cents to ninety-five (95) cents.

With this arrangement the registering capacity is increased, as all the other banks can be used for dollar amounts.

No. 462-2 C

Price  
\$450

**No. 462-2 C. Gives you practically Two Registers  
in One**

### *Two Total-adding Counters*

*Any Class 400 Register having six banks of keys  
may be equipped with two total-adding counters.  
Except No. 460.*

### *How This Style Register is Used*

**R**EGISTERS equipped in this way may be used for keeping separate records of two departments or clerks, or they may be used for recording cash in the right-hand division and weight in pounds in the left-hand division. They can also be used for recording cost and selling price.

Where trading stamps are given out, the two-counter feature of this style Register can be used to record stamps in the left-hand division and sales in the right-hand division.

**No. 442 - E L**

**Price  
\$390**

### **Electrically Operated and Illuminated Indication**

*For quick operation and all-around convenience in a bar, cafe, restaurant or confectionery store, in fact any business where it is not desired to register a smaller amount than 5 cents.*

### **How It Operates**

**T**O operate the Register, press the amount keys in the regular way and then a clerk's initial key. The motor is automatic in its operation of the Register; it is started by the pressing of a clerk's initial key and stops automatically when the record is completed.

The Illuminated Indication feature shown on this machine can be applied to any electrically operated Class 400 Register, when ordered. The lights remain lit as long as the cash drawer is open and draw special attention to the indication. Detachable handle for special use.
